

Costume of Original American Design

OUR fashions spring from revivals and adaptations of styles that have been worn before our day and feel the influence of all the corners of the earth. For some time the agitation on the subject of American designs for American women has been going on. The war in Europe brought this matter to a climax and a fashion show, under the patronage of wealthy society women of New York city, was staged recently at the Ritz hotel, in which the apparel displayed—on extremely clever models—was designed by members of American establishments and made in their workrooms.

The display altogether was creditable, although any startlingly new and wholly original ideas were lacking. In fact, few people are looking for anything of the kind. What we really want and take to are styles that have associations and suggestions that make them interesting. We like a hint of the oriental, a whisper of the savage, a glimpse of the ancient, and not a bold copy in any case. In fact, when nothing is left to the imagination, something is lost of charm.

A lovely gown, among other lovely things, appeared in the Ritz parade

from Kurzman—who is famous for trousseaux. It is pictured here and is a somewhat radical departure from present-day fashions. It is of white satin, brocaded with silver, and is made without trimming or elaboration. The skirt is flaring and full, hanging in set folds. The absence of shoulder straps, the pointed bodice and short, puffed sleeves revive memories of the days of the Renaissance. After much elaboration it seems severely simple. But there is a reaction toward simplicity which, it must be conceded, has improved the styles of today.

The skirt flaring at the bottom is dividing honors with the straight underskirt and long, full tunic, and bids fair to stand in the first place by spring. Both are beautiful in outline.

Whether we shall look to American designers to create our styles or find that we have been looking to them (while we thought all inspiration came from Paris) for many years, we are sure of one thing: America is not without the talent for creating beautiful clothes and this talent will be recognized through just such events as the exhibition at the Ritz.

Fur-Trimmed and All-Fur Hats and Turbans

TO MEET the flying snows that can do them little harm, fur-trimmed and all-fur turbans and larger hats in which fur is conspicuously figured, have been warmly welcomed by the world of fashion. There are few all-fur hats as compared to the great number in which fur forms a part of the hat or is employed simply as a trimming.

In turbans the coronets are usually of fur and the crowns of a fabric. Rich brocaded silks, plain velvet and cloth of gold or silver are featured in the crowns. There are some novel brimmed hats having crowns of fur and brims of gold or silver lace.

But it is in bands used as a trimming that fur is liked best. There is not much effort to use it in unusual ways. Large flowers of silver or gold lace, having each petal bound with fur, are novel and these, with ribbon or velvet trimmings bound with fur, are about the only new fur decorations. A wide band about the crown, a border of fur about a brim edge or band forming a coronet are the prevalent modes for using this most staple of things used in millinery.

Trimming on fur hats are very simple. A single flower or a single feather is the rule for the small turban. The head and neck of birds of gay plumage (imagined by the manufacturer and not grown by nature) are occasionally seen, and fluffy pompons seem appropriately posed against a background of fur.

The hats shown in the picture are fine examples of the way in which fur is used in millinery. The majority of millinery furs are imitations of the skins for which they are named. But they are equal to such demands as are made of them so far as wearing qualities are concerned. Hats made of fine, genuine skins are costly, but, considering their durability and the fact that these furs are never out of style and may be used again and again, they are, after all, among the most economical of hats.

JULIA BOTTOMLEY.

After exhaustive researches in Paris a famous French scientist has recommended a diet equally divided between meats and vegetables as the best for working people.

AS TO THE HANDKERCHIEF

Dainty Trifles Never Were Given More Attention Than They Are Receiving Just Now.

If you have the time, it is a wise and dainty thing to make your own handkerchiefs. If you wish to be really smart, remember the handkerchiefs used by the ultra-fashionable, at least in the morning and afternoon, are embroidered or initialled in color.

Usually the initial matches a color in the frock or the hat or some other accessory, if the principal part of the costume is white. It is well to have several handkerchiefs embroidered in green, if being a neutral color, so that they can be carried with those frocks for which you have no matching color. Frequently white handkerchiefs have border hems in color and an initial or monogram of the hem color. It is a pretty custom to embroider about the monogram or initial a little wreath or medallion frame.

WIFE WILL WISH HIS THIRST AWAY

Her Mere Desire Means "Presto! and She Has It," Says Husband.

SHE IS A REAL JINX

Teamster Tells Judge There Never Was Such a Wisher as His Wife—Could Have Aladdin's Lamp If She Wanted It.

Chicago.—"My wife," affirmed Fred Kaczmarek in the court of domestic relations, "has everything in the world she wants. All she's got to do is wish, and presto! she's got it. What she's hauled me into court for I can't make out."

"Drunkenness and non-support are the charges," explained the clerk. Kaczmarek looked disgusted.

"Now, ain't that just like a woman?" he demanded. "Haul me into court for things that are her own fault. If she wants me to cut out liquor all she's got to do is wish. If she wants to be supported she can wish for that, too. If she wished I was an alderman, I suppose I'd have to be one. I tell you, judge, you never saw a wisher like my wife."

Never Wished for This.

"Has she ever wished for Aladdin's lamp?" inquired the court.

"I don't know whether she has or not, judge, but believe me, she could have it if she wanted to. She could have any kind of a lamp. She could have an indirect lighting lamp in the kitchen and in the cellar if she simply wished for it."

"Another time she says to me; 'You loafer, I hope you dislocate your shoulder,' and so of course I had to do it."

Wished Horse to Step on Him.

"Then she said she wished the horse would step on me, and I couldn't get away from that horse to save my neck."

"She ain't a regular wife at all, judge; she's a jinx; she's a witch; she's a regular fate!"

"Do you think," inquired the court,

"She Says: 'I Hope You Fall Off the Wagon,' and That Same Day I Did."

"That you can keep sober now and support your wife if I release you on probation?"

"It all depends on her, judge," said Kaczmarek, with a shrug. "If she hopes I'll be sober I can't help it, and if she wishes for my pay I can't hold out a dime."

"Take your husband home and wish," ordered the court, addressing Mrs. Kaczmarek. "Next case."

HOGS ATTACK A POSTMASTER

Barefoot, Indiana Man Races for His Life From Heat-Crazed Animals.

Muncie, Ind.—A drove of hogs, crazed by the heat, would have killed Emory J. Niday, postmaster of Muncie, had they been able to get at him as he lay in a hammock on his farm, he says.

The hogs, which had been acting queerly, charged him. Niday crawled into the higher part of the hammock and sat huddled there as he called for help, the animals, in the meantime, standing on their hind feet in an effort to reach him.

Finally the hogs noticed Niday's shoes and socks, which were on the ground, and devoured them. While the attention of the hogs were thus distracted Niday leaped from the hammock and raced at top speed for the nearest fence, pursued by the animals. He fell over the fence in safety, and, barefooted, hurried to town in his automobile.

KILLS BIG FISH WITH PISTOL

Nine-Foot Catch So Vicious Revolver Has to Be Empty Into Its Head.

Clarksdale, Miss.—A garfish weighing 187 pounds and measuring nine feet was brought to this city by Sam Antonio.

The fish was caught in the old bed of the Sunflower river, a few miles from this city, and fought so violently that a pistol had to be emptied into its head before it could be drawn from the water.

Baby Fondles Poison Snake.

Lancaster, Pa.—A two-year-old son of Mr. and Mrs. Joseph Gehman of Boymanville, while playing in the yard, was bitten by a copperhead. The little fellow picked up the snake, and it struck its fangs deep in his flesh. His screams attracted members of the family, who killed the snake.

WHY pay money for fancy boxes when what you really want is high-grade cigarettes?

FATIMA; the Turkish-blend cigarette. "No Gold Tips, but finest quality"—20 for 15c.

"Distinctively 'individual'"

If you cannot secure Fatima Cigarettes from your dealer, we will be pleased to send you three packages postpaid on receipt of 50c. Address Fatima Dept., 111 Fifth Ave., New York, N.Y.

Liggett & Myers Tobacco Co.

Boatmen's Bank St. Louis

Oldest Bank in Missouri

Our Certificates of Deposit are a simple and safe investment. Not subject to fluctuations of the Stock Market. You deposit cash, and when the time is up you withdraw cash, plus the interest, at the rate of 3% per annum for six months or 4% per annum for twelve months. Issued in sums of \$50.00 and upwards. Mail us your check, and we will send you a certificate by registered mail.

CAPITAL AND SURPLUS
\$3,000,000

WANTED To hear from owner of good farm for sale. See description and prices. Northwestern Business Agency, Dept. A, Minneapolis, Minn.

LITTLE CHANGE IN VIENNA

One Would Hardly Know There Is War, Says Postcard Received From There.

A postcard from Vienna describing present conditions in that city, received by a Buffalo man, brings surprising news. The correspondent states that conditions in the Austrian capital are nearly normal and one would not know that Austria was at war except for the fact that there are nearly 500 cannons captured from the enemy decorating the public places.

All mail is carefully inspected, for every piece is stamped with an official seal marked, ueberprüft, which signifies approval. That probably accounts for the great delay which all Austrian mail suffers. In ordinary times mail reaches Buffalo from Vienna in ten to twelve days.

"Life in Vienna is perfectly normal, there is no suffering, and the theaters are playing. Everyone goes quietly to his work, for everyone knows that they are on the right side. One would scarcely know here in Vienna that we were having a war if it were not for nearly 500 foreign cannons standing in the plazas for exhibition," says the card.

For Itching, Burning Skins.

Bathe freely the affected surface with Cuticura Soap and hot water. Dry without irritation and apply Cuticura Ointment with finger or hand. This treatment affords immediate relief, permits rest and sleep and points to speedy healing in most cases of eczema, rashes, itching and irritations of the skin and scalp of infants, children and adults. Free sample each with 32-p. Skin Book if you wish. Address post-card: Cuticura, Dept. X, Boston. Sold everywhere.—Adv.

Chapter of Syrian Life.

In Syria a chaperon is the law of social intercourse between the young folks. At the wedding ceremony the bride appears in the center of a brilliantly illuminated room. On all sides are attendants carrying large candles richly painted and decorated. As she takes her chair, what money she possesses of gold and silver is placed on her head.

The gift of the bridegroom is 40 dresses, and, as the wedding celebrations last two weeks, the bride has a chance to display her gowns, making numerous changes daily for the delightful edification of her friends.

As a rule, these dresses last a lifetime, and are usually handed down from one generation to another, and, unless destroyed otherwise than by wear, they are everlasting.

Translating by Ear.

Two schoolgirls were busily occupied by their lessons, when the younger asked, abruptly:

"What does 'avoidupolis' mean?"

"Well, I couldn't say just what it means in English," replied her friend, doubtfully, "but in French it means, 'Have some peas.'"—Youth's Companion.

Explaining It.

"Jim says he's a self-made man."

"That accounts for his seamy appearance."

His Nationality.

"Is that man a Swedeborgian?"

"No; he's a Welshman."—Baltimore American.

MANITOBA'S AGRICULTURAL INDUSTRY

REMARKABLE DEVELOPMENT IN THAT PROVINCE DURING THE PAST FEW YEARS.

The past year has shown that the Province of Manitoba, the Premier Province of Western Canada, stands out prominently in point of wealth in her agricultural productions. Manitoba has an excellent yield of wheat in 1914, the oat crop was not so good, and with the high price received, every farmer was placed in a good financial position.

For some years, as is probably the case in all new countries, Manitoba went largely into the growing of grain, and while this paid well for a time, it was found that having to purchase his meat, his milk and a number of other daily requisites, the farmer did not pay as it should. Now, there is another side to it. Fodder crops are grown, cattle are being raised, cheese factories and creameries are established, and the result is that the financial position of the farmers of Manitoba is as strong as that of those in any other portion of the continent. Scarcely a farmer today but has realized that the growing of grains alone has a precarious side, and that positive security can only be assured by diversified farming, and securing the latest modern and most economic methods. Therefore timothy, clover, alfalfa, rye grass and fodder corn are universally grown. Most wonderful success meets the efforts of the farmers in the cultivation of these grasses, and the yields compare favorably with those of many older countries, while in many cases they exceed them.

It is worth while recording the acreage of these crops this season as compared with last, because the figures reflect the remarkable progress that is being made in dairying and in the beef and pork industry. In 1913 bromegrass was sown on 24,912 acres, rye grass on 21,917 acres, timothy on 118,712 acres, clover on 5,328 acres, alfalfa on 4,709 acres and fodder corn on 20,223 acres. In 1914 the respective acreage under those crops were 25,444 acres, 27,100 acres, 165,990 acres, 7,212 acres, and 10,250 acres and 30,430 acres. Alfalfa particularly is coming into its own, the acreage having been more than doubled last year.

It is simply the natural process of evolution from the purely grain farming which Manitoba knew as the only method twenty years ago to the more diversified forms of agriculture that is responsible for the development along these other lines in this Province. Alberta is coming to it at an earlier stage than did Manitoba. Saskatchewan, too, is following rapidly in the same direction.

Then, as her fodder crop and root crop acreage indicate, there have been increases in the holdings of all kinds of live stock during the past twelve months, according to the correspondent of the Toronto Globe. Beef cattle number 42,000 head this year, as against 37,000 last year; milk cows are 160,474 head, as against 157,963 head; pigs number 325,000 as against 248,000; sheep number 75,000, as against 52,000; and there are 325,000 horses, as compared with 300,000 at this time last year. These are the latest Provincial figures, and they show that despite the great exodus of live stock to the United States since the opening of that market to Canada, the capital amount of live animals has increased instead of having decreased through the extra demand.

Dairying the Principal Industry.

Dairying is the industry, however, which is making dollars for the Manitoba farmer. It is developing at a rapid rate in this Province for that particular reason. The output of creamery butter last year was 4,000,000 pounds, at an average price of 27.5 cents per pound, which was an increase over the previous year of a million pounds. The output of dairy butter was recorded last year at 4,288,276 pounds. The Government department says that again this year a substantial increase in the dairy output will be shown from this Province. From this same source of information one finds that through the splendid growth in winter dairying, Winnipeg now, for the first time in years, is able to obtain a sufficient supply of milk and sweet cream from its city dairies to satisfy its demand throughout the year without having to import large quantities of these products from the United States as was done not longer than two years ago.—Advertisement.

Mountains of Rock Salt.

Near Jelfa, Algeria, is to be seen a mountain of rock salt, 300 feet in height and nearly a mile in diameter. Two other hills of this character are known in Algeria, both being near Biskra, and in all cases the salt is surrounded by triassic marls and clays. A curious feature of the Jelfa hill is the fact that in spite of the very soluble character of the material composing it it stands up in high relief from the surrounding clay and contains no valleys or other sign of erosion. It does, however, contain a number of sink holes, as in a limestone country. When the brief torrential rains of winter occur the water sinks almost at once into these cavities and soaks through the permeable salt, emerging at the margin of the hill in salt springs.

Surpassed.

"There aren't as many circuses as there used to be."

"There is not as much demand for them. Who wants to see a man turn somersaults while he rides a horse when an aviator may happen along any minute and loop the loop."

When a woman promptly admits the age you suggest, mark it down she is older than that—Omaha Bee.

HARD TASKMASTER IS GENIUS

Possession That Sets a Man Apart From His Fellows Keeps Him Constantly at Work.

Genius, what is it but the power of being able to read? No respecter of birth, it chooses the cottage gladly, hiding in the rags of a tinker, loving the hovel, the plowland, the grimed and smoky roof. It is a personality, a living creature, a greater-than-man in man, a reading master, an angel of kindness and a tyrant of cruelty, smiling at the pupil one time, scourging him another; and as the body comes to its power with years it hears the master always teaching, never at rest, speaking with a distinct voice, unfolding pictures without end, and the amanuensis cannot keep pace with this tyrant who hurries him on with, "See this," and "See that," working while the body sleeps, showing portions of the way and work of life which are still far ahead, planning out the whole life right up to the end, giving everything eagerly, if with pain, when the time comes. That is genius, the power which works not for the man, but against him. No labor can make what is not there. Application makes a man able to learn, but not to teach, and if the master is absent no learning will call him, just as without learning—or great tribulation—he cannot be awakened; for genius is nothing but the power of reading what has been written upon the mind of an unknown tongue; and without a Daniel the writing cannot be interpreted; and Chaldeans and astrologers will strive in vain.—From "Granite," by John Trevena.

YOUR OWN DRUGGIST WILL TELL YOU Try Murine Eye Remedy for Red, Weak, Watery Eyes and Irritated Eyelids. No Smarting, No Eye Ointment. Write for Book of the Eye by mail Free. Murine Eye Remedy Co., Chicago.

Gave It Up.

Two pickpockets were standing on their trial, notorious thieves. None the less, they contrived somehow to put up a good defense, thanks mainly to the cleverness of the lawyer whom they employed. The detective who had effected the arrest spent a miserable twenty minutes in the witness box, contradicting himself repeatedly. "Then what made you suspect the men?" asked the lawyer. "As I said before, one of them was wearing an overcoat with a slit in the lining, so that he might operate more easily." "Come, come," said the lawyer, "would you arrest me if you saw me wearing such an overcoat?" "No, sir, I happen to know who you are. You're a lawyer." "Well, what's the difference between a lawyer and a pickpocket?" The detective shook his head. "I really don't know," he muttered.

A Personal Grievance.

"When I was a boy my ambition was to join a minstrel company, put on a red coat and a silk hat and parade the streets of my native village."

"I had some inclination for the stage myself, but that wasn't what I might call the consuming ambition of my boyhood."

"No? What was it?"

"I wanted to grow up with the physique of a prizefighter and whip the dogcatcher in our town."

Canned.

Four Years (in Sunday school)—We've got a new baby at our house. Rector (not recognizing him)—And who are you, my little man?

Four Years—I'm the old one.—Life.

Sugar exists not only in the cane, beetroot and maple, but also in the sap of about 190 other plants and trees.

Lovemaking of Kings.

The Kaiser was in love with the daughter of the duke of Schleswig-Holstein when he married her; the Austrian emperor fervently worshiped the ill-fated Empress Elizabeth, whose life was always something of an unreal romance; the king of Italy went swooning in true lover's style his very charming princess of Montenegro, while the impetuous lovelorn of King Alfonso when he sought the hand of Princess Ena, was testimony, if such were needed, of how strongly she appealed to his affections.

Rather Hopelessly.

"When a man is without uplifting influence he is apt to degenerate," said the amiable philosopher.

"Quite so," answered the cynic, "but nothing less than a steam derrick will uplift some men and I hear that the supply is limited."

And That Helps.

"How does he keep the wolf from the door?"

"I don't know; but I know his wife boils cabbage nearly every day."

Look for happiness; trouble will come without being looked for.

A man's past interests a woman less than his presents.

Are Your Kidneys Weak?

Do you know that deaths from kidney troubles are 100,000 a year in the U. S. alone? That deaths from kidney diseases have increased 73% in 20 years? If you are run down, losing weight, nervous, "blue" and rheumatic, if you have backache, sharp pains when stooping, dizzy spells and urinary disorders, act quickly, if you would avoid the serious kidney troubles. Use Doan's Kidney Pills. There's no other medicine so widely used, so successful or so highly recommended.

An Illinois Case

"Every River Tells a Story" Edwin Gucker, Western Ave. road, Mattoon, Ill., says: "The pains in the small of my back were bad. I could hardly stoop. The kidney troubles were profuse and too frequent to mention. I was weak, languid, couldn't sleep well and was all run down. Doctors said I could live but a short time. Fortunately I used Doan's Kidney Pills and soon improved. Before long all the distressing ailments left me. Since then I have been in good health."
